NFL model leans, Week 9

Board built 2026-11-10 01:45 UTC; book prices as of 2026-11-09 23:19 UTC. Not bets: these are where the model disagrees with the market and why. The bets are on the Best bets card.

The model's own edges: 0

Sides the market-adjusted projection makes +EV with no price edge, no opener gap and no wind. On the NFL board they carry no stake: on the graded bets since 2019 none of the model's claimed edge has shown up (haircut 8%). Their record is in the last column.

None this week.

Every game: where the model leans

The board's side of each spread and total (the market-adjusted projection's), with its chance. Most sit close to 50%: a lean is not a bet; the bets are on the Best bets card.
