College football best bets, Week 9

Board built 2026-10-31 00:07 UTC; book prices as of 2026-10-30 23:30 UTC; injury designations checked 2026-10-30.
Results through Oct 29, 2026. Bankroll $1,000. Lines move: check the book before betting.

The card: 31 bets

In the order to take them: prices that beat Pinnacle's own number first (no model needed), then the model's edges against the opening line, then the model alone. Moneylines appear only when a price beats the sharp line. Stakes are quarter Kelly, capped at 3% a bet, sized as if 52% of the model's claimed edge were real — bets marked (bucket) are sized from their bucket's own record instead.

Teasers: 0 legs clear at −120

Six points added, chances from the market's own curve (no model); a two-leg teaser at −120 needs every leg above 73.9%. Enter your book's price on the board's Teasers section if it differs.

No leg clears the break-even at –120 this week.

Every game: where the model leans

The board's side of each spread and total (the market-adjusted projection's), with its chance. Most sit close to 50%: a lean is not a bet, and the bets are the card above.
