# NFL best bets, Week 9

Best Bets record so far: 9-4 (69.2%), +25.7% per unit, CLV –0.0%. Full record on the board's Model record page.

Board built 2026-11-09 23:23 UTC; book prices as of 2026-11-09 23:19 UTC; injury report 2026-11-09 23:20. Results through Nov 8, 2026. Bankroll $1,000. Lines move: check the book before betting.

## The card: 0 bets

In the order to take them: prices that beat Pinnacle's own number first (no model needed), then the model's edges against the opening line, wind unders, and nothing on the model alone (no stake: those are in Model leans, a separate document). Moneylines appear only when a price beats the sharp line. Stakes are quarter Kelly, capped at 3% a bet, sized as if 8% of the model's claimed edge were real — bets marked (bucket) are sized from their bucket's own record instead. Weekly cap 10% of bankroll; this week 0.0%. Wind unders are staked at half until they have a season graded on forecasts.

*Nothing to bet this week: no price beats the sharp line and the model is not far enough off any opener.*

## Teasers: 0 legs clear at −120

Six points added, chances from the market's own curve (no model); a two-leg teaser at −120 needs every leg above 73.9%. Wong legs cross both 3 and 7. Enter your book's price on the board's Teasers section if it differs.

*No leg clears the break-even at −120 this week.*

## Player props

*No props file for this week is on hand (they arrive with the props run about three days before kickoff).*

For research and entertainment. Past results do not predict future results, and nothing here is betting advice. Every number is the board's projection at build time; the live board (rhyman7.github.io/fb-value-board) is current.
