# NFL model leans, Week 9

Board built 2026-11-08 18:37 UTC; book prices as of 2026-11-08 18:32 UTC. Not bets: these are where the model disagrees with the market and why. The bets are on the Best bets card.

## The model's own edges: 3

Sides the market-adjusted projection makes +EV with no price edge, no opener gap and no wind. On the NFL board they carry no stake: on the graded bets since 2019 none of the model's claimed edge has shown up (haircut 8%). Their record is in the last column.
